EXPERIENCE

Software Engineer — Fidelity National Information Services,   June 2021 - December 2022
Hoover, AL

- Developed high-performing **Java** software solutions to reduce time and resource usage for company applications
- Utilized scripting languages (**PowerShell** and **Bash**) to assist programs with accurately handle dates and times in various time zones
- Streamlined **Jenkins** pipeline to ensure builds ran efficiently after changes were pushed through **Git**
- Established **RESTful API** connection for secure storage of system performance results
- Optimized web-based applications with **JavaScript** and **HTML** code enhancements and recommendations to teammates
- Applied **Agile** methodologies (**Kanban** then later **Scrum**) with a **CI/CD** pipeline for bug resolution before production
- Executed **SQL** queries for updating user privileges within databases
- Wrote detailed documentation that was used for training new members of the team's code base and practices

Inventory Associate — WIS International, Pensacola, FL   May 2018 - June 2021

- Monitored inventory levels and identified discrepancies, ensuring accuracy of stock data
- Inspected supplies and product inventories to assess quality and quantity, returning unsuitable materials to vendors
- Trained 30+ employees on equipment used
